Periodic Monitoring Text: Visible emissions observations shall be made and recorded. Note that to properly determine the presence of visible emissions, all sources must be in clear view of the observer. The observer shall be at least 15 feet, but not more than 0.25 miles, away from the emission source during the observation. The observer shall select a position where the sun is not directly in the observer's eyes. If the observations cannot be conducted due to weather conditions, the date, time, and specific weather conditions shall be recorded. When condensed water vapor is present within the plume, as it emerges from the emissions outlet, observations must be made beyond the point in the plume at which condensed water vapor is no longer visible. When water vapor within the plume condenses and becomes visible at a distance from the emissions outlet, the observation shall be evaluated at the outlet prior to condensation of water vapor.

If visible emissions are observed, the permit holder shall report a deviation. As an alternative, the permit holder may determine the opacity consistent with Test Method 9, as soon as practicable, but no later than 24 hours after observing visible emissions. If the result of the Test Method 9 is opacity above the opacity limit in the applicable requirement, the permit holder shall report a deviation.

Monitoring Information	
Indicator: Sulfur content of the fuel.	
Minimum Frequency: At each fuel purchase.	
Averaging Period: N/A	

Deviation Limit: Fuel oil < 0.8% sulfur. Should fuel blending be practiced, document the procedure to ensure the fuel oil meets the sulfur requirement and record sulfur composition of the blended fuel which is used.

Periodic Monitoring Text: Maintain fuel purchase and composition records together with a record of any change in fuel composition to demonstrate that only fuel oil < 0.8% is burned in the unit. Should fuel blending be practiced, document the procedure to ensure the fuel oil meets the sulfur requirement and record sulfur composition of the blended fuel which is used.
